

# Comparison of Traditional Turf vs. Eco-Lawn™

	<b>Eco-Lawn™</b>	<b>Traditional Turf</b>
<b>Root System</b>	9" - 14" depth ability to source water & nutrients naturally	2" - 3" depth shallow root system
<b>Water Requirements</b>	minimal	1 - 2 inches per week
<b>Grows well in Sandy Soil</b>	Yes	No
<b>Grows well in Clay Soil</b>	Yes	No
<b>Grows well in Loam Soil</b>	Yes	Yes
<b>Grows well in Full Sun</b>	Yes	Yes
<b>Grows well in Part Shade</b>	Yes	Depends on degree of shade
<b>Grows well in Deep Shade</b>	Yes	No
<b>Grows well in Acidic Soil (i.e.: under Pine trees)</b>	Yes	No
<b>Fertilization Requirements</b>	None	Mandatory
<b>Blade Characteristics</b>	Very fine, requires less water. Soft to walk on. Bends over under its own weight.	Thick, rough blades require frequent watering, mowing and fertilization
<b>Weeds</b>	Dense root system crowds out weeds. Allelopathic, produces a natural pre-emergent herbicide	Requires chemical weed control
<b>Mowing Requirements</b>	3 - 5 times per year	1 - 2 times a week
